NOTES TO CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS For the three months ended June 30, 2024 and 2023 (Unaudited) (In Canadian dollars)

#### 1. Going concern

These condensed consolidated interim financial statements have been prepared on the basis of accounting principles applicable to a "going concern", which assumes that Burcon NutraScience Corporation ("Burcon" or the "Company") will continue its operations and be able to realize its assets and discharge its liabilities and commitments in the normal course of operations for the foreseeable future. In assessing whether the going concern assumption is appropriate and whether there are material uncertainties that may cast significant doubt about the Company's ability to continue as a going concern, management considers all available information and actions within its control with respect to the future which is at least, but not limited to, twelve months from the end of the reporting period.

The Company has incurred losses since its inception and as at June 30, 2024, had an accumulated deficit of \$143.9 million (March 31, 2024 - \$142.0 million). During the three months ended June 30, 2024, the Company incurred a net loss of \$1.9 million (2023 - \$1.9 million) and had negative cash flow from operations of \$1.8 million (2023 - \$1.2 million).

The Company began commercial production of its hemp protein isolate in the year ended March 31, 2024, and subsequent to June 30, 2024, the Company began commercial production of its canola protein isolate. During the three months ended June 30, 2024, the Company generated revenue from the sale of hemp protein isolate and from the provision of contract research services. The Company has not earned significant revenues from its technologies.

The Company's ability to continue as a going concern is dependent upon the Company's ability to successfully commercialize its technologies, scale production and raise additional capital to fund its planned commercialization and research and development activities. The Company has historically relied on equity and debt financing to fund its operations. While the Company is considering various financing options for its short-term and long-term liquidity requirements to maintain its operations and fund its commercialization and research and development activities, there can be no assurance that additional financing may be available on acceptable terms, if at all. If Burcon is unable to raise additional funds when it needs them, it may be required to delay, reduce or eliminate some or all of its commercialization efforts or research and development programs. Therefore, these conditions result in material uncertainties that may cast significant doubt over the Company's ability to continue as a going concern.

These condensed consolidated interim financial statements have been prepared on a going concern basis, which assumes that the Company will be able to meet its commitments, realize its assets and discharge its liabilities in the normal course. These condensed consolidated interim financial statements do not reflect adjustments to the carrying values of assets and liabilities that would be necessary if the Company was unable to continue as a going concern and such adjustments could be material.

#### 2. Nature of operations

Burcon is headquartered in Vancouver, British Columbia, Canada.

Burcon is a plant protein technology company that has developed high purity and functional proteins for foods and beverages derived from pea, canola, soy, hemp, sunflower seeds, among other plant sources. The Company has an extensive portfolio of composition, application and process patents covering its technologies.

## 3. Material accounting policies

## **Basis of presentation**

These condensed consolidated interim financial statements are prepared in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board ("IFRS Accounting Standards") applicable to the preparation of interim financial statements, including International Accounting Standards ("IAS") 34, Interim Financial Reporting, on a basis consistent with those accounting policies followed in the most recent annual consolidated financial statements.

These condensed consolidated interim financial statements do not include all of the information required for full annual financial statements and, as such, should be read in conjunction with the Company's consolidated annual financial statements for the year ended March 31, 2024.

The condensed consolidated interim financial statements were approved and authorized for issue by the Audit Committee of the Board of Directors on August 12, 2024.

#### **Principles of consolidation**

These condensed consolidated interim financial statements include the accounts of the Company and its subsidiary. All material intercompany transactions and balances have been eliminated on consolidation.

A subsidiary is an entity in which the Company has control, directly or indirectly. Under IFRS Accounting Standards 10, an investor controls an investee if and only if the investor has power over the investee, exposure, or rights, to variable returns from its involvement with the investee, and the ability to use its power over the investee to affect the amount of the investor's returns. The financial statements of subsidiaries are included in the consolidated financial statements on the date on which control commences until the date on which control ceases. When control over a subsidiary is lost, the assets and liabilities of the subsidiary are derecognized. Any resulting gain or loss is recognized in profit or loss. Any interest retained in the former subsidiary is measured at fair value when control is lost.

## Revenue recognition

The Company has multiple revenue streams and revenue is recognized in a manner that depicts the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods and services.

- Revenue from the sale of protein isolate is recorded at the point of sale, when the customer assumes control of the products as defined in the terms of agreement with the customer.
- Revenue associated with contract research services are recognized when the services are rendered.
- Revenue earned from licensing agreements that grant third parties rights to use the Company's technologies are earned based on sales made by the licensee.

## Newly adopted accounting standards and amendments

Amendments to IAS 1 – Classification of Liabilities as Current or Non-Current

The amendment clarifies the classification requirements to determine if a liability should be presented as current or non-current in the statement of financial position. Under the new requirement, the assessment of whether a liability is presented as current or non-current is based on the contractual arrangements in place as at the reporting date and does not impact the amount or timing or recognition. The amendment was adopted on April 1, 2024 with retrospective application and the adoption did not have a significant impact on the consolidated financial statements.
